

VIBS613 - Homework 10

Daniel Osorio - dcosoriorh@tamu.edu

Department of Veterinary Integrative Biosciences

Texas A&M University

1. Given the undirected network $A - -BA - -CA - -DA - -EB - -CB - -EB - -GB - -HD - -FE - -I$, compute the **betweenes centrality of A: 13**

- a) $B - -A - -D$
- b) $B - -A - -D - -F$
- c) $C - -A - -D$
- d) $C - -A - -E$
- e) $C - -A - -D - -F$
- f) $D - -A - -E$
- g) $D - -A - -B - -G$
- h) $D - -A - -B - -H$
- i) $D - -A - -E - -I$
- j) $E - -A - -D - -F$
- k) $F - -D - -A - -B - -G$
- l) $F - -D - -A - -B - -H$
- m) $F - -D - -A - -E - -I$

2. Given the undirected network $A - -BA - -CA - -DA - -EB - -CB - -E$, compute the **clustering coefficient of A: 0.33**

$$\frac{E(N(A))}{\binom{N(A)}{2}} = \frac{2}{\binom{4}{2}} = \frac{2}{6} = 0,33$$
